

# Crystalline Cellulose

Sustainably sourced specialty cellulose

Mild thermo-mechanical pre-treatment process produces a non-sulfated and no odor microcrystalline cellulose suitable for many application areas. Microcrystalline cellulose comes in two different grades: Natural and Refined. All grades are available as paste. Upon request dried material can be also available.

	Natural	Refined crystalline cellulose	
	Crude crystalline cellulose	Blonde crystalline cellulose	White crystalline cellulose
Solid content	<20	<20	<20
pH	Alkali	Alkali	Alkali
Cellulose content [%]	60-70	75-85	90-95
Lignin content [%]	20-30	5-10	2-5
Hemicellulose content [%]	1-2	1-2	1-2
Ash content [%]	3-6	2-4	1-4
